IGNATIUS LIYAN

Flutter Developer | Fresher

I am a dedicated and enthusiastic recent graduate with a strong passion for developing reliable and user-friendly mobile applications using Flutter. I am eager to contribute to a dynamic team where I can leverage my skills in application development to create seamless and innovative user experiences. I am motivated to work on impactful projects that challenge industry standards while expanding my expertise in mobile app development, implementation, and collaborative problem-solving.

05/2023 - 09/2023   *Chennai, Tamil Nadu, India*
NRG Phoenix Technology specializes in Digital Transformation, AI, IoT, custom apps, Digital Marketing, Enterprise AI, and E-commerce solutions.

Achievements/Tasks

- I immersed myself in mastering Flutter, which allowed me to gain invaluable hands-on experience in developing user-friendly applications.

- I focused on creating intuitive and responsive user interfaces, leveraging Flutter's robust framework to ensure a seamless user experience across different platforms.

- I took on the critical role of testing, where I performed both validation and unit testing. This involved creating and executing test cases to validate the functionality of the application and ensure that each component worked as intended.

SKILLS

Flutter · Dart · Java · Firebase · Android Development · SQL · Git · GitHub · REST APIS · Mobile Application Developement · Problem Solving · Critical Thinking · Collaborative work

PROJECT

Gas Booking System (08/2023 - 01/2024)
- The Gas Booking System has User and Admin modules. Users request connections, Admins review, and approved users can book cylinders.
- The Admin Module lets admins review connection requests, monitor activities, manage bookings and payments, and update statuses.
- The Admin Module lets admins handle connection requests, track user activities, and manage bookings and payments, including approvals and status updates.
- The system includes an admin dashboard for managing requests and bookings, secure authentication, data encryption, reporting tools, and user support.
